Venice AI Ecosystem Staking Platform

VVVeco is the decentralized staking protocol built on Venice AI ecosystem, offering flexible staking modes, generous yield returns, and team referral mechanisms.

Why Choose VVVeco?

Flexible Staking

Coin-based and Fiat-based dual modes, 7-60 day flexible periods, up to 1% daily yield, real-time earnings.

Secure & Transparent

Built on Base chain smart contracts, all transactions on-chain verifiable, principal fully unlocked at maturity, 0 fee withdrawal.

Team Growth

V1-V8 eight-level system, compressed 7-tier team performance calculation, plus 10% / 5% / 3% invitation rewards for three downstream generations.

Ecosystem Integration

Deep integration with Venice AI ecosystem, official Agent, Chat, Studio tools included, full AI service experience.

STAKING MECHANISM

VVVeco Staking

Choose your staking mode and period to start your yield journey. Earnings are generated in real-time, 10% fee on reward claims.

Recommended

Coin-Based Mode

Earnings calculated based on VVV token quantity. Pursue compound returns from both token accumulation and price appreciation. Ideal for long-term VVV believers.

- ↗ Rewards in VVV
- ↗ Double gains from price rise
- ↗ Better compounding effect

Fiat-Based Mode

USD-denominated returns with built-in downside protection. Lock in fixed USD earnings with price cushion mechanism. Ideal for conservative investors seeking stable returns.

- 🔒 USD-locked rewards
- 🛡 Price cushion protection
- 📊 Predictable stable returns

Min \$100 | Principal unlocked at maturity, 0 fee withdrawal

🏆 V1-V8 Level System

Compressed-tier system — auto-upgrade when team performance reaches threshold, higher level means higher reward ratio. Invitation rewards are settled separately from team performance.

PRIVACY ARCHITECTURE

AI That Respects Your Privacy

While others log and analyze your prompts, Venice ensures your conversations remain yours alone.

TIER 1

Anonymized

Access premier third-party models. All identifying metadata is stripped before processing.

TIER 2

Private

Zero data retention on self-hosted open-source models. Your prompts are never stored.

TIER 3

TEE (Trusted Execution)

Hardware-secured enclaves ensure Venice itself cannot access your computation.

TIER 4

End-to-End Encrypted

Client-side encryption. Your prompts are encrypted before leaving your device. Only TEE decrypts.

[Learn More About Privacy](#) ↗

DEVELOPER API

One API for Everything

Text, images, video, music, speech, embeddings, and web tools through a single industry-standard API. One key. Zero data retention.

```
chat.ts

import Venice from "venice-ai";

const venice = new Venice({ apiKey: "your-api-key" });

const response = await venice.chat.completions.create({
  model: "llama-3.3-70b",
  messages: [
    { role: "user", content: "Hello, Venice!" }
  ],
  stream: true
});

for await (const chunk of response) {
  process.stdout.write(chunk.choices[0]?.delta?.content || "");
}
```
